REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

US 5,613,259 to Craft et al. discloses a brush head assembly, a housing, frame, power supply, electric coil and core that creates an alternating flow of current in the coil, a driveshaft, and at least one magnet (see prior Office Action). Craft et al. further disclose a torsion bar (Column 7 Lines 4-5) in an alternate embodiment. However, if the device of Craft et al. were to use a torsion bar, in order to mechanically operate it would not be clamped by an anchoring plate.

US 5,263,218 to Giuliani et al. discloses all structural elements except for a torsion bar being clamped by an anchoring plate.

None of the additional prior art made of record discloses that the torsion bar is clamped by an anchoring plate to a frame, that the torsion bar is secured to a magnet plate between first and second magnets, or that the driveshaft is connected at the internal end of the armature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
